PLANNING COMMITTEE

Nam H. Nguyen, President
Samuel P. Bugis, Program Chair

PROGRAM OBJECTIVES

The British Columbia Surgical Society’s 68th Annual Spring Meeting is a forum for academic and community surgeons in BC to present papers on current clinical experience, innovations and research. It is also a forum for surgical residents from the UBC surgical resident training program to present their research and compete for a research prize.

The target audience is national and international general surgeons who present clinical and basic science research material in lecture and podium form. Standard podium presentation is 10 minutes, and 5 minutes for discussion. The papers are peer reviewed.

The learner shall share in the clinical experience of other surgeons within the Province of British Columbia, the United States of America and the surgical residency at the University of British Columbia. Further, the learner shall gain exposure to expert dissertations on subjects of current interest to the general surgeon.
